

# VIVID-TECH AS

“The need for European, secure, and user-controlled platforms is growing rapidly – and Vivid-Tech is ready.”

# Introduction

“This is not yet another video-meeting company or an AI stunt — Timeline-IT makes digital meetings more effective by gathering everything in one place and highlighting what *you* mark as important.”

“AI is only as good as your structure.”

# The Problem

Organizations today are facing a silent crisis:

**Valuable insight from meetings, projects, and decisions is disappearing - and it's costly.**

“In a digital workday where insight gets lost, structure is missing, and AI has no way of knowing what matters - control and continuity become critical challenges.”

- 📁 **Meetings and documents are scattered**
- 👤 **Turnover destroys continuity**
- ⚠️ **Compliance requirements are increasing**
- 👉 **Sign-language interpretation is expensive and hard to access**
- 🛡️ **Data sovereignty is a requirement, not a choice**

# The Solution

**Timeline-IT is a European platform that makes digital meetings and work processes more efficient, secure, and accessible.**

It brings documents, transcriptions, and highlights together in one place - **structured by the user**, not by AI alone - ensuring continuity even when teams change, requirements increase, or interpretation services are unavailable.

## The Solution:

- Efficiently stores meetings, documents, and attachments for continuity during turnover.
- Makes available and easy to view what the user deems important.
- Everything visualized for quick overview and secure sharing with AI assistants and sign language interpretation.
- On a European platform with the data sovereignty you expect.

# Share Issue & Key Figures

- **Share issue date:** 27 March 2026 at 12:00
- **Subscription period:** 14 days (Closing April 10)
- **Price per share:** NOK 297
- **Pre-money valuation:** NOK 52,443,369
- **Capital sought:** Up to NOK 2,970,000 (maximum 10,000 shares)
- **Minimum investment:** NOK 10,395 (35 shares)
- **Use of funds:** Technology development, market expansion, operational maturity, and IP strategy

**Milestones 2026–2028:** 20,000 end users in the Nordics by 2026 – EU rollout with existing customers by 2027 – 500,000 end users and full operational scalability by 2028
